

ONCOMINE SEMINAR

15. junija 2017
od 10:50 do 13:00

Vabimo vas na predavanje z diskusijo dr. Patricka Hollenderja z naslovom:

Targeted biomarkers NGS screening in oncology: from translational to daily routine approach. A review of applications and OncoPrint assay

Predavanje organizira podjetje Omega d.o.o. v sodelovanju z Inštitutom za patologijo Medicinske fakultete v Ljubljani in partnerjem Thermo Fisher Scientific.

Predavanje bo potekalo na **Medicinski Fakulteti, Katedra za patologijo, Predavalnica MF, 2. nadstropje, Korytkova 2, Ljubljana** in sicer **v četrtek, 15. junija 2017, med 10:50 in 13:00.**

Kratek opis predavanja:

“The main focus of our seminar is to present the solutions in oncology research and diagnostics of cancer. The complete comprehensive workflow will be presented as well as many different applications such as targeted solid tumour characterisation approach (colon & lung, melanoma, breast), important for therapy and prognosis, as well as comprehensive and broader approach for clinical trials. We will also focus on liquid biopsy solutions and challenges and on the introduction of NGS use in immunotherapy.”

Predavanje priporočamo vsem, ki se ukvarjate z raziskavami in diagnostiko raka. Če menite, da je primerno za katerega od vaših kolegov, mu prosimo posredujte to vabilo.

Toplo vabljeni!

Z lepimi pozdravi,

ekipa Omega
