

10x Genomics Roadshow | Ljubljana, Slovenia

From Single Cell to Spatial Transcriptomics with 10x Genomics

DATE

October 2, 2019

TIME

09:00am—12:30pm

LOCATION

Restavracija Livada
Hladnikova 15
1000 Ljubljana, Slovenia

REGISTER AT

Description

Whether you want to dissect cell-type differences, investigate the adaptive immune system, or discover copy number variation and genomic heterogeneity on a cell-by-cell basis, the Chromium System from 10x Genomics is the answer. Characterize and profile gene expression in hundreds to tens of thousands of single cells, sequence paired, full-length B-cell or T-cell repertoires, or profile hundreds to thousands of single cell genomes to reveal genome heterogeneity and understand clonal evolution. These are just a few of the ways our solutions can provide unparalleled insight into previously inaccessible information. Learn how to enhance your biological discoveries with our genomics and high-throughput single cell transcriptomics products and explore our newest single cell technologies such as the Single Cell ATAC Solution and Single Cell Gene Expression Solution with Feature Barcoding technology.

Agenda

09:00 – 9:30	Registration
09.30 - 09.40	Welcome and Introduction of Omega d.o.o. Gregor Kovač, Omega d.o.o.
09.40 - 09.55	Welcome and Introduction of 10x Genomics, Inc Federico Biella, 10x Genomics, Inc
09.55 - 10.55	3' GEX - Single Cell Gene Expression , 5' V(D)J - Single Cell Immune Profiling Solution and Feature Barcoding Luca Mazzitelli, 10x Genomics, Inc
10.55 - 11.30	Coffee Break
11.30 - 12.30	ATAC Assay for Transposase Accessible Chromatin and Visium for Spatial transcriptomics Luca Mazzitelli, 10x Genomics, Inc
12.30 - 12.45	Closing of the seminar
12.45	Lunch
