

Oncomine Solutions

Enabling precision oncology – from clinical research to companion diagnostics

ONCOMINE SEMINAR

petek, 7. junija 2019, od 10:00 do 11:30

Vabimo vas na predavanje dr. Marca Pirotte z naslovom:

“Bringing Precision Molecular Oncology closer to the Patient”

Predavanje organizira podjetje **Omega d.o.o.** v sodelovanju z **Inštitutom za patologijo Medicinske fakultete v Ljubljani** in partnerjem **Thermo Fisher Scientific**.

Predavanje bo potekalo na

**Medicinski Fakulteti v Ljubljani, Katedra za patologijo,
Seminarska soba (2. nadstropje)**

Program:

- 09:50 – 10:00 Registracija
- 10:00 – 10:05 Predstavitev
- 10:05 – 11.30 “Bringing Precision Molecular Oncology closer to the Patient”, dr Marco Pirotta, Thermo Fisher Scientific
- 11:30 – 12:00 Diskusija in pogostitev

Kratek opis predavanja:

The main focus of our seminar is to present solutions in diagnostics of cancer and oncology research. We will cover the complete molecular oncology workflow, starting with targeted approaches focusing on optimized therapy selection and prognosis, based on solid tumor or cfDNA analysis. More comprehensive and broader approaches, that also find place in research and clinical trials, will also be covered. These include tumor mutation load assays, childhood cancer research, as well as use of next-gen sequencing in immunotherapy.

Predavanje priporočamo vsem, ki se ukvarjate z raziskavami in diagnostiko raka. Če menite, da je primerno za katerega od vaših kolegov, mu prosimo posredujte to vabilo.

Toplo vabljeni!

Ekipa Omega d.o.o.
